Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/065,939

Applicant(s)

SEHLIN, SCOTT R.

Examiner

Harry D Wilkins, III

Art Unit

1742

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-7 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-7 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 02 December 2002 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. §§ 119 and 120

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 13) ☒ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application) since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.
- a) ☐ The translation of the foreign language provisional application has been received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121 since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) ____.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: in paragraph 4, line 6, ""in" should be "is" and in paragraph 19, line 7, "one" should be inserted after "include".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Carlson et al (US 5,797,964).

Carlson et al anticipate the invention as claimed. Carlson et al teach (see abstract and col. 4, lines 1-30) a power supply including a DC power (voltage) source in an electrical power circuit, a plurality of fixed resistance resistive elements arranged in parallel in the circuit, switching means for selectively connecting desired resistive elements in the circuit and control means for controlling the connection of at least one resistive element in the circuit. The controller controllably affects a varying voltage (i.e.- varying flow of charged particles) through the circuit.

Regarding the claim limitations (in both claims 1 and 2) relating to a gas generating system, these limitations are a future intended use of the claimed power

Art Unit: 1742

supply apparatus. Patentability of an apparatus is related to the structural elements contained in the claim, not the manner of using the apparatus. See MPEP 2114 as well as *In re King* 231 USPQ 136 (Fed. Cir. 1986).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admission of prior art in view of Carlson et al (US 5,797,964).

Applicant admits as prior art (see paragraphs 4-6, 13 and 16 and figure 3) that electrochemical gas generating systems for concentrating a selected gas from a feedstock fluid of the ceramic membrane system permeable to selected charged particles flowing from a first side to a second side were known.

However, Applicant's admission does not teach the variable-voltage circuitry as claimed.

Carlson et al teach (see abstract and col. 4, lines 1-30) a power supply including a DC power (voltage) source in an electrical power circuit, a plurality of fixed resistance resistive elements arranged in parallel in the circuit, switching means for selectively connecting desired resistive elements in the circuit and control means for controlling the connection of at least one resistive element in the circuit. The controller controllably affects a varying voltage (i.e.-varying flow of charged particles) through the circuit.

Therefore, it would have been obvious to have added the variable-voltage circuitry of Carlson et al to the apparatus of Applicant's admission because the precise control of voltage would allow for precise control of gas generation in the electrochemical system.

Regarding claim 4, Carlson et al teach (see col. 4, lines 7-10) using resistors.

Regarding claim 5, Carlson et al teach (see col. 4, lines 7-10) using resistors.

Resistors generate waste energy in the form of heat.

Regarding claims 6 and 7, the apparatus of Applicant's admission requires (see figure 3) several sources of heat, including to pre-heat the fluid and also to heat the oven chamber. Carlson et al teach (see col. 4, lines 7-10) using resistors. Resistors generate waste energy in the form of heat. Therefore, it would have been obvious to one of ordinary skill in the art to have adapted the apparatus of Applicant's admission to use the resistors of Carlson et al to either preheat the fluid or to heat the oven chamber in order to reduce energy wasting.

Conclusion

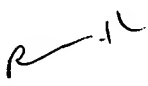

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harry D Wilkins, III whose telephone number is 571-272-1251. The examiner can normally be reached on M-Th 10:00am-8:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy V King can be reached on 571-272-1244. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 571-272-1700.
